Summary

PMP-certified project manager with a BS in Computer Science. Led a mostly offshore team of up to 20 developers across seven concurrent applications, and ran delivery for a game studio that shipped four iOS titles and was acquired. Since 2021 I have run Browsea, my independent software studio, managing a portfolio of product initiatives from concept through delivery with the schedules, trackers and status dashboards to run them.

Skills

- **Project management:** scheduling and baselines, work breakdown, scope and change control, risk registers, resource allocation, stakeholder reporting, portfolio prioritization, Agile/Scrum and kanban
- **Tools:** Microsoft Project, Excel, Power BI, Jira/Confluence, Trello, Git
- **Technical:** Python, JavaScript/TypeScript, SQL, C#/Unity, AI-assisted development

Experience

Project Manager and Product Developer

Browsea, Houston, TX

Jan 2021 - Present

- Managed a portfolio of 20+ product initiatives from concept to prototype; scored each on complexity and completion, ran market-readiness reviews, and paused or cut those that did not justify further investment.
- Led a three-person team from concept to a competition-ready MVP of Formwise, a tool that explains and fills complex forms: cut scope to a live-demo MVP, kept a nine-item risk register, and designed a privacy model that keeps personal data away from the language model. Selected as one of three winners of a University of Houston AI entrepreneurship competition (2025).
- Delivered an AI production pipeline for an independent comics publisher (image cutouts, generative fill, Unity integration, voice cloning), coordinating input from the client's designer, comic artist, animator and writer; produced two short visual novels and an animation prototype.
- Ran PMP preparation as a five-week project: built a study platform, audited 1,414 practice questions from three banks for answer-key errors, and passed the PMP in August 2026.
- Run about 50 applications as one program: shared standards, a design document with scope limits for each app, deferred-work lists and a formal architecture review; direct AI coding agents from written specifications.

Lead Software Engineer and Offshore Operations Manager

Avabyte, Houston, TX

Jun 2018 - Dec 2020

- Managed seven concurrent ad-supported game and entertainment applications through release and formal acceptance with 5 to 20 developers, mostly offshore.
- Held a release schedule set by the advertising budget by breaking similar products into shared, reusable features, so the pace held while the workload on each new app dropped.
- Introduced code review and written delivery guidelines; built an internal staffing and multi-project tracking tool, run alongside Trello and Slack, to assign work by each developer's strengths.
- Shifted my hours to overlap offshore time zones; mentored developers to independent delivery and led product-level QA.

Project Lead

Shuffleware, Houston, TX

Jan 2016 - May 2018

- Led delivery for a studio of up to five people, from concept to App Store launch, on four iOS card games (*Gates*, *Deal!*, *Spider Solitaire*, *Pyramid*), with final authority on budget and resource allocation.
- Took a game from a school project to E3, drew publisher interest from Ubisoft, and chose outside investor funding over publisher deals that did not fit.
- Led the negotiations and built the analytics and demo material that brought the studio and its portfolio into Avabyte through acquisition.

Education

Bachelor of Science (B.S.) in Computer Science, Minor in Mathematics

University of Houston, Houston, TX

Graduated 2016

Certifications

Project Management Professional (PMP)

Project Management Institute (PMI), issued Aug 2026, certification number 4499087
