SUMMARY

PMP-certified technical project manager with a BS in Computer Science, delivering software since 2016. Ran seven concurrent applications with a mostly offshore team of 5 to 20 developers, and led delivery for a game studio that shipped four iOS titles and was acquired. Manages schedules, budgets, scope, risk and stakeholders across the SDLC, and reads the code the team writes.

SKILLS

- **Project management:** scheduling and baselines, WBS, scope and change control, risk registers, budget management, resource allocation, stakeholder reporting, vendor and offshore teams, release management, UAT
- **Methods and tools:** Agile, Scrum, Kanban, PMBOK, SDLC; Microsoft Project, Excel, Power BI, Jira, Confluence, Trello, Git
- **Technical:** Python, JavaScript/TypeScript, SQL, C#/Unity, AI-assisted development and LLM tooling

EXPERIENCE

Browsea Houston, TX
Project Manager and Product Developer Jan 2021 - Present

- Delivered an AI production pipeline for an independent comics publisher (image cutouts, generative fill, Unity integration, voice cloning), coordinating requirements and reviews across the client's designer, comic artist, animator and writer; shipped two short visual novels and an animation prototype.
- Led a three-person team from concept to a working MVP of Formwise, a tool that explains and fills complex forms: cut scope to a live-demo MVP, kept a nine-item risk register, and designed a privacy model that keeps personal data away from the language model.
- Managed a portfolio of 20+ product initiatives from concept to prototype with budgets, schedules and status dashboards; scored each on complexity and completion, ran market-readiness reviews, and paused or cut those that did not justify further investment.
- Run about 50 applications as one program under shared standards, per-app scope limits, deferred-work lists and a formal architecture review; direct AI coding agents from written specifications.

Avabyte Houston, TX
Lead Software Engineer and Offshore Operations Manager Jun 2018 - Dec 2020

- Managed seven concurrent ad-supported game and entertainment applications through release and formal acceptance with 5 to 20 developers, mostly offshore, and managed project budgets.
- Held a release schedule set by the advertising budget by breaking similar products into shared, reusable features, so the pace held while the workload on each new app dropped.
- Introduced code review and written delivery guidelines; built an internal staffing and multi-project tracking tool, run alongside Trello and Slack, to assign work by each developer's strengths.
- Coordinated cross-functional work across time zones, shifting my hours to overlap offshore teams; mentored developers to independent delivery and led product-level QA.

Shuffleware Houston, TX
Project Lead Jan 2016 - May 2018

- Led delivery for a studio of up to five people from concept to App Store launch on four iOS card games (*Gates*, *Deal!*, *Spider Solitaire*, *Pyramid*), with final authority on budget and resource allocation.
- Took a game from a school project to E3, drew publisher interest from Ubisoft, and chose outside investor funding over publisher deals that did not fit.
- Led the negotiations and built the analytics and demo material that brought the studio and its portfolio into Avabyte through acquisition.

EDUCATION

University of Houston Houston, TX
Bachelor of Science (B.S.) in Computer Science, Minor in Mathematics Graduated 2016
